

LEADING EXPERTS OF SINUS AUGMENTATION

**Nov. 2-5
2023**

Tiziano Testori

Pascal Valentini

Stephen Wallace

Homa Zadeh

Taylor Carle

Shahram Ghanaati

Shi Yin

Vishtasb Broumand

LEADING EXPERTS OF MAXILLARY SINUS AUGMENTATION

The treatment options for the atrophic posterior maxilla have evolved over the years to include various modalities of maxillary sinus augmentation, guided bone regeneration (GBR) and application of alternative implants such as short implants and zygomatic implants. Since its introduction in the 1970s, the maxillary sinus augmentation procedure has undergone numerous modifications. There are innumerable surgical modalities for performing lateral and crestal sinus augmentation. Although sinus augmentation procedures collectively have good outcomes, the predictability of these specific procedures could vary considerably. This educational event has assembled the leading experts in this field who will present the latest developments in surgical techniques, biomaterial and protocols. They will present evidence-based protocols to increase the predictability, reduce procedure invasiveness, shorten treatment time and reduce the complication rate. The program will also address the most significant complications, their prevention and management. There will be three workshops on simulated models, plus an all-day cadaver workshop. This is an event which is appropriate for surgical clinicians, but may be of interest to clinicians of all disciplines.

Hope to see you there.

	Tuition
In-Person lecture	\$895
Remote lecture	\$645
Homa Zadeh workshop	\$449
Stephen Wallace workshop	\$449
Shahram Ghanaati workshop	\$449
Tiziano Testori cadaver Pascal Valentini workshop	\$1595
Lecture + all workshops	\$3795

Thursday November 2, 2023: Pre-symposium Focus sessions with hands-on workshops

Pacific Time	Speaker	Topic, event description
8:00-11:00am	Shahram Ghanaati	Hands-On Workshop: Floating implant: simultaneous implant placement with sinus augmentation with ceramic implant
11:30-2:00pm	Stephen Wallace	Hands-On Workshop: Sinus Augmentation Using Diamond Rotary System (DASK)
2:30-5:30pm	Homa Zadeh	Hands-On Workshop: Crestal sinus augmentation with intra-operative navigation guided surgery

Friday November 3, 2023

9:00am	Stephen Wallace	Evolution of the Lateral Window Sinus Elevation Surgical Technique
11:15am	Pascal Valentini	Maxillary Sinus Grafting using the lateral approach: "What I Did and What I Do Now"
2:00pm	Taylor R. Carle	Sinus Development and Anatomy. Common pathologies that affect the maxillary sinuses. Medical and surgical management of sinonasal disease.
2:00pm	Pascal Valentini	Sinus post-operative complication and management
3:45pm	Homa Zadeh	GBR vs sinus augmentation: decision tree for therapeutic options for the management of atrophic posterior maxilla
4:30pm		Panel discussion

Saturday November 4, 2023

8:00-9:00am		Registration, breakfast and exhibits
9:00am	Tiziano Testori	Simplified Antrostomy Design (S.A.D. Technique) in maxillary sinus surgery: lateral approach & simultaneous horizontal augmentation
11:15am	Vishtasb Broumand	Graftless reconstruction of the severely atrophic maxilla
2:00pm	Shi Yin	Division 2 Block and Palatal Approach Maxillary Sinus Augmentation
3:45pm	Homa Zadeh	Augmentation vs non-augmentation options for the moderately atrophic posterior maxilla
4:30		Panel discussion

Sunday November 5, 2023: Post-symposium Cadaver workshop

8:00-5:00pm	Tiziano Testori & Pascal Valentini	Cadaver Hands-On Workshop: Maxillary sinus augmentation complete protocol and material selection
