

Leading Experts of Bone and Tissue Regeneration

May 29-June 1, 2025

Luca De Stavola

Mariano Sanz

Navid Sharifzadeh

Homa H. Zadeh

Lorenzo Tavelli

Course Description:

Effective management of atrophic alveolar bone is crucial for long-term success in implant dentistry, where the balance between sufficient bone volume, quality, and soft tissue support determines functional and esthetic outcomes. This four-day symposium brings together a distinguished panel of global leaders in bone and soft tissue regeneration, each presenting their unique approaches to bone augmentation. Through a dynamic mix of two days of in-depth lectures and two immersive hands-on workshops, participants will explore the latest techniques, materials, and protocols for achieving predictable and stable results in bone and soft tissue regeneration. This diverse exchange of expert knowledge will provide clinicians with a comprehensive understanding of the benefits and limitations of various bone augmentation strategies, empowering them to make informed decisions for enhanced patient care.

Educational Objectives:

1. Understand and compare leading techniques and materials used in bone regeneration for atrophic alveolar bone, assessing their indications, advantages, and limitations.
2. Gain hands-on experience with state-of-the-art bone augmentation protocols and materials, enhancing clinical confidence in managing complex cases.
3. Integrate the latest advancements in bone regeneration into clinical practice to improve the functional and esthetic outcomes of implant procedures.

Thursday, May 29, 2025		
Time	Speaker	Session
8:00 AM – 5:00PM	Luca De Stavola	Lecture & Hands-on Workshop: <i>Alveolar Ridge Augmentation</i> Lecture Title: <i>The Digital Workflow in Autogenous Bone Shell Technique</i>
Friday, May 30, 2025		
8:30 AM – 10:30 PM	Mariano Sanz	Keynote Lecture: <i>Current and Future Approaches to Hard Tissue Augmentation Staged and Simultaneous to Dental Implant Placement</i>
10:30 AM – 11:00AM		Break and Exhibits
11:00 - 12:30	Homa Zadeh	<i>Complications of alveolar ridge augmentation</i>
12:30 – 1:30 PM		Lunch
1:30 – 3:30	Mariano Sanz	Continuation of Keynote Lecture
3:30 – 4:30 PM	Homa Zadeh	Interplay between bone and soft tissue
4:30 – 5:00 PM		Panel Discussion
Saturday, May 31, 2025		
8:30 AM – 10:30AM	Lorenzo Tavelli	Lecture: <i>Soft Tissue and Dental Implants – Prevention and Treatment of Esthetic Complications, and Papilla Reconstruction at Implant Sites</i>

Tuition	
In-person Lectures: 16 CE Units	\$1295 (before Feb 1) \$1495 (before March 15) \$1695 (after April 15)
Luca De Stavola All-day Workshop 5/29: (8 CE Units)	\$895 (before Feb 1) \$995 (before March 15) \$1095 (after April 15)
Sharifzadeh or Tavelli workshop: (4 CE Units Each)	\$445 (before Feb 1) \$495 (before March 15) \$595 (after April 15)
In-person lecture + all workshops: (32 CE Units)	\$2095 (before Feb 1) \$2295 (before March 15) \$2495 (after April 15)
Remote Lectures:	\$595 (before Feb 1) \$695 (before April 1) \$795 (after March 15)
Free with Gold Membership	

Saturday, May 31, 2025		
Time	Speaker	Session
10:30 – 11:00 AM		Breaks and Exhibits
11:00 – 12: 30 PM	Navid Sharifzadeh	Lecture: <i>Regenerative Modalities for Soft Tissue Enhancement Around Dental Implants</i>
12:30 – 1:30 PM		Lunch
1:30 – 3:00 PM	Lorenzo Tavelli	Continuation Lecture: <i>Soft Tissue and Dental Implants – Prevention and Treatment of Esthetic Complications, and Papilla Reconstruction at Implant Sites</i>
3:00 – 3:30 PM		Break / Exhibits
3:30 – 4:30 PM	Navid Sharifzadeh	Continuation Lecture: <i>Regenerative Modalities for Soft Tissue Enhancement Around Dental Implants</i>
4:30 – 5:00 pm		Panel Discussion
Sunday, June 1, 2025		
8:00 AM – 12 PM	Lorenzo Tavelli	Hands-on Workshop: <i>Peri-implant Soft Tissue Augmentation</i>
1-:00 – 5:00 PM	Navid Sharifzadeh	Hands-on Workshop: <i>Regenerative Modalities for Soft Tissue Enhancement</i>
